

Geo-Engineering & Weather Derivatives: Betting On The Skies

DECEMBER 11, 2014 / CONSCIOUSAWARENESSFORALL / EDIT

WEATHER DERIVATIVES are brokered deals which amount to companies or individuals betting on future weather conditions. They treat weather as a commodity. Economic factors such as the purchase and use of natural gas for heating and electricity for cooling are affected by the weather. One can use the stock market to gamble not only on companies associated with those factors, but also by investing in weather derivatives to insure a hefty pay day. Factor in **GEO-ENGINEERING**, where one can control the weather AT WILL (see: **HAARP**), and it is a potential breeding-ground for greed and corruption.

The first publicly-traded **weather derivative** was issued in the U.S. in 1996. A major early pioneer in this business was Enron (whose unwavering corruption eventually led to their demise). The idea has since gained ground across the globe. The Chicago Mercantile Exchange currently lists, sells and trades weather derivative contracts for 25 major cities in the U.S., 11 in Europe, 6 in Canada, 3 in Australia and 3 in Japan.

TUES	58°	37°	48		17°	\$340	
WED	61°	30°	46		19°	\$380	
Total \$2680/ per contract							

With the emerging public awareness of geo-engineering such as chemtrails, cloud seeding and ocean fertilization, we can see why control of the weather while simultaneously BETTING on that weather is *more* than a conflict of interest, and why it would draw the interest of the global banking elite. The U.N.'s Agenda 21 and its "Sustainable Development" program add another layer to this conflict of interest.

Here are some samples of weather derivative filings and paperwork:

- ▶ <https://pdf.yt/d/AeLz3emWzyHqn1H8>
- ▶ <https://pdf.yt/d/WYb2eSMUdVogiciZ>

One estimate puts the weather derivative market to be worth more than **\$19 BILLION**.
